Langford BC V9B 2X8

To whom it may concern:

Gerry Brimacombe, Principal Consultant for Lightlever Systems Inc., has recently provided the of City of Langford a Vacation Request System hosted on our SharePoint site. This solution has automated the approval process of providing leave to staff, and provided a consistent, centralized interface for all City Staff.

Gerry diligently worked on this project and consistently performed at a level of distinction.

Gerry's strong work ethic is self evident and his service manner with clients is calm and reassuring. He was respected by our Application group. When provided feedback on some minor issues with the solution and request for added features of the product he willingly offered and executed innovative solutions. He always took the time to listen to our concerns and respond positively.

I am confident that he will continue to succeed with merit in any endeavor he chooses. I would highly recommend him and his services to any organization.

Respectfully,

A handwritten signature in black ink, appearing to read 'Steve Stinson', with a large, stylized flourish at the end.

Steve Stinson
